

Press Release

"O. KLEINER AG presents their new packaging solution: PacXpert™ at Interpack14"

08.05.2014

## **O. KLEINER AG presents their new packaging solution: PacXpert™**

At this year's Interpack14, O. KLEINER AG will present their new packaging solution PacXpert™, issue of a close cooperation with Dow Chemical.

The user-friendly pouch, recloseable thanks to a screw-top, is available in various sizes. Its integrated handles permit easy pouring and its structure prevents "glugging".

When filled, the package possesses great stand-up stability, allowing for easy stacking. Once emptied the package takes up a minimal amount of room and weighs virtually nothing, permitting ease of transport and disposal. Being much less voluminous than equivalent rigid packs, disposable material and costs are reduced to a minimum.

These packages possess an excellent sustainability profile thanks to the minimal use of materials, energy and water in production, and the carbon-neutral packaging of O. KLEINER AG.

Great optical properties offer ideal advertising space with high marketing impact on four printable sides with see-through windows.

### Technical Data:

- ⇒ Volume 2, 3, 4, 5, 10, 15, 20 litres
- ⇒ Spout diameter 31 and 50 mm with a screw cap
- ⇒ Optics transparent or opaque
